## Something Sparked Mari Carr

Jeannette's life is...nice. Great job in the family restaurant, cute house, sweet cat. All very nice...and boring...and maybe a little lonely. But she'll suffer that price for the safety she desperately covets. Now, if only something could keep her safe from the temptation that is Luc and Diego. The gorgeous firemen are a danger to her libido, if not her heart.

Lovers Luc and Diego have had a hunger for the pretty cook at Sparks Barbecue since they rolled into town three years ago. But everyone knows Jeannette doesn't date, so the men's lust seems destined to go unslaked, no matter how much they want her in their bed. If friendship is all she's willing to offer, Luc and Diego will greedily take it.

That changes quickly when an arsonist throws Jeannette in harm's way, forcing her to find security and comfort in Luc and Diego's arms. But the trio's simmering heat is barely a flicker before the men learn Jeannette has secrets that run dark and deep...presenting them with a challenge unlike any they've yet to face.

Note: This book contains a scene of abuse from 16-year-old Jeannette's past.

Jeannette has a full life working in the family restaurant with her sister and many cousins, and she even has her own home now, along with a stray cat she adopted. Although she appears to be happy, she is still lonely. She doesn't date, ever. And the men in Maris know it. But it doesn't change the draw Jeannette has to the handsome firefighter duo of Maris. Both Luc and Diego frequent her restaurant and the sweet, gentle flirting that they typically share with her is beginning to increase into something more, and Jeannette is finding their constant request for a date harder to fight. Unfortunately, Jeannette has a secret, a past so horrific that even the idea of dating anyone, much less her two gorgeous firefighter friends, is completely off the table.

Luc and Diego have been the best of friends since they were teenagers. They have a unique relationship and most of the town of Maris suspects what it is but have ignored the idea since the two have devoted their lives to protecting and serving their small town. But ever since they walked in to the Sparks restaurant and laid eyes on Jeannette they've been drawn to her, wanted her.

For all that, there is a deep appearance of sadness in the eyes of the only woman that they both care about. She has continuously rejected or made light of their every attempt to date her. However, when danger finds its way to Maris and then to Jeannette the two men will stop at nothing to protect the woman they are both falling for.

Sweet story of deep sadness over a past terrible experience that has had Jeannette locked up emotionally and sexually. Can two men love her enough to help her heal and move on?

Includes scenes of abuse of 16 year old Jeannette, and sexual activity with m/m/f.

I was pleasantly surprised by the way Jeanette confronted the villain from her past. Thought I would have seen a bit more of the "Dom" in Diego, since it was brought up, but I liked the heroes. That it took them years to make more of a move on her was odd. Also wish I would have had a bit more to the HEA conclusion. The epilogue is one of those that's supposed to get you into the next book in the series, featuring a different heroine who was a secondary character in this title.

Something Sparked by Mari Carr is an amazing read. This is a fairly short read, a great choice for those with limited time for reading. Ms Carr has delivered a well-written book. Her characters are fabulous and lovable, a perfect fit for this story. This is a menage story though, so it may not be everyone's cup of tea. Jeannette, Diego and Luc's story is loaded with drama, humor, suspense and smokin' hot sex. I totally enjoyed Something Sparked and look forward to reading more from Mari Carr in the future. Something Sparked is book 2 of the Sparks In Texas Series but can be read as a standalone. This is a complete book, not a cliff-hanger.

#### **Dangerously hot**

Love, second chances, family, Luc and Diego are two hot firemen who moved into their small town a few years ago. Since day one, they asked Jeanette to go out, and she refused every time. Although she was wildly attracted to them, until she was threatened by danger they became her protectors.

So i think i am clearly not reading the story info correctly or would not have been so shocked. Color me surprised that this was a threesome MMF story. However, by the time I figured it out, there was enough storyline that made we want to continue and know what happens. All in all, this was a good story if not a bit rushed in getting over the trauma. Good free time passer.

What do you get when you throw together a girl who guards her heart better the fort not, two hot and steamy firemen who love each other but know a peice is missing and one talented as hell writer, well you get this amazing book.

From the first scene I fell in love with the character heck I love the sparks family already but those two fireman well let's just say I'll take them of her hands any day.

A beautiful well written book that I lived and adored bring on the next spark family member

This book is definitely a must read! I couldn't put the book down. I had to find out who was after Jeanette and if Luc and Diego would be there for her. These two really stepped up when she needed help. Jeanette really changed and it was great to see! This is the first book I have read in the series, but not the last.

### **Shelly says**

I started finding errors (articles and syntax) early in this purchased book and just couldn't help but start to judge the quality of the story. Jeannette's from a big family but she's chosen the life of a social recluse. I found her to be a nice person but I didn't understand why she chose to keep herself apart from these admittedly wonderful and loving people. They'd not hurt her in any way. I didn't understand her pushing them away and by the end of the book, I wasn't made to understand either.

Jeannette doesn't date, I don't mean she hasn't dated in a couple months or years - she just doesn't date. So when a couple of firefighters, who moved to town a few years ago, flirt, tease and basically cajole her into going out with them she finally succumbs to their persuasiveness. I wouldn't even call it charming because they weren't. The scene when Jeannette accepted their offer of a date seemed off - I didn't think that she'd accept based on what happened. I had a hard time believing her character changed that much in a few minutes because she's not an impulsive person.

Jeannette's part of the Sparks family that makes up a big part of the small town. She works at the family restaurant that's a staple in the town. She's got a good life if you're looking from the outside in. When we meet Jeanette, she's going through a rough patch. There's something in her past that's been eating away at her for the last 15 years and it's sucking all the life out of her. She's going down the slippery slope of depression and she knows it because she's been there before. I'm not sure how she's gotten out of it in the past as it's not discussed but this time she has the distraction of Luc and Diego.

Jeannette's determined to do something different and that different is going out with Luc and Diego. Luc and Diego are best friends (twice in the story they reference each other as brothers, listen folks I'm no prude but that's disturbing on so many levels I can't even tell you) and lovers. The thing with them is that they don't date separately. It's always together and everyone in the small town knows it. Jeannette's opinion on their dating history is the same as everyone else's - no-one gets it. To be honest, I didn't get it either.

The story started out well. Jeannette, Luc and Diego actually went on dates. The first time they got to first base was fun for all. There was no pressure, nothing forced. The guys didn't try to talk her into anything and Jeannette, with her history, didn't miraculously decide she's gotta have it and have it right now. But I knew it wouldn't last.

When her house is destroyed by a fire, she goes to live with Luc and Diego. Yep, here it comes. I was sorely

disappointed with what the author did to Jeannette's character. I thought the intent here was that she's a sweet, likable, staid and self-protecting personality. But the more I got to know her the less I liked. She doesn't pay attention to anyone around her. She's got this big family but at 31 years of age doesn't realize how much they care about her. These people took her in when she was 16 and both her parents were killed in a car accident. Spoiler alert. (view spoiler) How does this person who's without sexual experience 'know' there's something going on between Luc and Diego. Does she have some sixth sense that sees things that aren't visible to the naked eye?

*Jeanette had never used a tampon, never masturbated, never gone to the gynecologist. Nothing.*

How does that person who's totally ignored her sexual organs insists during her first night of, almost, coitus with Luc and Diego claims she wants to watch Luc and Diego have sex, not just fellatio but full on anal. I had to put the book down for a bit at that point because I was just too outdone because I was just disappointed.

The three eventually has their HEA and the identity of the bad guy wasn't a secret to me. All in all, this story was a big disappointment and although I initially wanted to read the other books in the series I don't see myself doing that at this point.

Happy reading folks!

### **Guilty Pleasures Book Reviews says**

Slick's review posted at Guilty Pleasures Book Reviews

For years Jeannette Sparks has been the quiet one, the Sparks who sticks to the sidelines, the one who doesn't make waves and the one everyone in town has called Nervous Nettie and when her high school boyfriend returns to town bringing with him a whole host of bad memories, Jeannette decides to take charge of the pathetic life she's been living and agrees to go out with Diego Rodriguez and Luc Kovach the two men who make up the town's paid firefighters and the two men who are known to only "date" women together. Diego and Luc have pursued Jeannette since they came to town and she's resisted, but once she says yes the two men are determined to show her just how good things can be between them.

It had been evident to me that Jeannette was hiding something and I wasn't all that surprised by her secret, but I have to give Diego and Luc credit for allowing her the time she needed to talk about it and with their unwavering support and patience. I really loved how both men seemed to understand her and both appealed to different sides of her and while that scared her it also made her stronger. Jeannette was also very intuitive when it came to Diego and Luc which just made their feelings for her even stronger.

Anytime there is a triad relationship there are bound to be some problems, but these three really meshed together well from the start and they were all really good about talking about their fears, issues and their

unusual relationship.

This story was a bit more emotional than the previous books and tackled some hard issues, but it was every bit as sexy and satisfying if not more so including one heck of an epilogue (and I do so love an epilogue)!

What a sexy, short read this turned out to be! I haven't read any of the previous books in the Sparks in Texas series, but you can be sure that I'm going to remedy that real soon. I just love Mari's books, and this one is another great example of how she can write a steamy but yet adorably sweet books.

Jeannette has a deep secret she is hiding from everyone, especially her family, that has crippled her ability to engage in relationships. Despite this, Luc and Diego are on a mission 2 years in the making to make her theirs. These guys...seriously I have no words for how sweet they were while taking their time with Jeannette all while trying to help her reclaim her life. They were quite wonderful, and I just loved them to pieces. Jeannette, on the other hand, stole the show for me. She is such a strong character, and you can't help but admire her inner strength and determination to overcome her past. I loved the bit of suspense we get with the book as well, so overall it was a great read that I'm definitely going to suggest to you all.

Ugh! where do I start... The beginning of this book just dragged on, I found myself skimming thru it just to get to the interesting parts. I can't stand reading books about a wimpy, sappy, depressed heroine and that I got that with Jeannette. It took until almost the end of the book to explain why Jeannette was such a boring character, you get the gist of why she's the way she is but it's not really explained until almost the end. Another annoyance to this story is how do you go from a woman not having sex in years to starting a relationship with not one but two men, and how can she have the heroine getting all hot and heavy with her two hot men and then stopping them from going further then explaining to them about her past and immediately having sex with them. Don't get me wrong I actually loved Luc and Diego, I just didn't see how they were matched up with Jeannette I think a heroine with not such a depressing past would have changed my opinion on this book.

I just found this to be a bit unrealistic and boring.

#### **Hot, steamy, overall good**

although it seemed a bit rushed at times, it was still a good story line and a good read. I picked a 4-star because there's a few scenes that in my opinion went from absolute fear to over-the-top in a matter of seconds when in real life that could not possibly happen, I know it's all in the nature of the book but that little

bit still disappointed me slightly. Overall for not being aware of this author I was pleasantly surprised.
