Ikhwan alim says

competence is like an iceberg floating on the sea. 90% about motive and trait. 10% only about skill and knowledge.

Iqbal says

this is the book that describe that competencies are more valuable than anything..assume this..if you had gp 3.8 but you dont have any competencies for the job..than..useless to work..this book provide anything that leads to superior performance..and how to design your competencies model in your office..nice book..fully recommended

Sitha says

If you need a reference to build your competency model, try this book. It is a good one and will help you much.
