Informative. This book did a nice job of breaking down and explaining the basic teachings of Islam including (but not limited to) prayer, fasting, the status of women. It addresses the ideological foundation and basic concepts of Islam, the application of faith, how Islam is applied to daily life, and a section at the end dedicated to five common distortions about Islam.

An interesting read, especially for one living in a Muslim country. An excellent alternative to bombarding friends with questions stemming from cultural curiosity...

Rafik Beekun says

One of the most thoughtful introduction to Islam. This book is great because it does not just talk about Islamic rituals, but also explains why. A great gift to anyone interested in Islam or to any Muslim seeking to better understand his/her faith.

This book cuts to the point of every worship, habit and principal in a clear and concise way, so because of that it should be in every Muslim household let alone be the first book recommended to people curious about Islam.
