I loved this book so much! I think I bought it in the beginning of 2015 at BJ's.

This book has a ton of different facts and different little activities. There are sections for things such as space, animals, and tons of other things to read!

This is a great book for anyone who loves almanacs and certain fun and random facts. I have read a lot of almanacs, and these are some of my favorites. They are simple to understand and colorful. I feel that these books are geared towards younger kids, but are great! Happy Reading!

Once again, National Geographic have produced a fun and nice to read almanac. I liked reading the almanac, I think people who don't even enjoy reading would like reading these articles and facts. I had fun reading, whenever I had free time it became a habit to go to this book and read 15-20 pages.
