This book is full of all sorts of relationships. Friendships, soul mates, incredible bond with a certain owl (that I desperately want for my own) mentors etc. I found the world to be quite magical and I'm going to be peering curiously at every waterfall I come across. Although I loved each other characters, i feel they lacked depth and found myself wanting more description. I wanted to know more about the elders. For an authors debut book, I have high hopes for book 2!!

Absolutely love the cover for this novel! The world the author has created is quite interesting. It's sort of a mix between Harry Potter and Narnia with more romance, magic with worlds beyond our own. I don't want to spoil too much or go into detail so all I'll say it will be interesting to see what happens next.

I kept losing interest and had to force myself to go and read.

Wow! I absolutely loved this book!!! Meeting Kali was awesome, and then meeting everyone else just made it so much better. The book started quick, and just kept getting better. You fall in love with everyone you meet. I had a great time getting to know everyone, and can't wait to read the next one!!!

Title: To the Falls.

Genre: Fantasy

Fun. Magical. Feel Good.

Normal College student Kali turns twenty and finds out she's not that normal after all.

She finds out that she is actually a Guardian, from another world, and that the dreams she has been having for the past year have been preparing her for the new world.

Her best friend, Jordon, is also a Guardian and her protector. Which makes it easier for her to adjust.

She meets the lovely Lucas, her soulmate, and feels an instant connection with him.

The story picks up and takes off and keeps getting better and better as you read it. With a beautiful ending.

I am still new to reading so-called epic fantasy and I'm still not sure that this is a genre that I really love. So much of it seems way too contrived, even for a fantasy.

This was a good book, but not a great book. Too much of it was just too easy. For example, girl travels to a place she didn't know existed only to instantly meet her soul mate. How does she know he is her soul mate? Why, because his eyes change color, of course!

Her parents and her best friend have all lied to Kali throughout her entire life, but she instantly accepts that life as she has known it will never be the same. Then, she becomes the baddest of the magic wielders in just a few lessons. Add in the requisite bad guy sucking all of the good magic from her new world, a secret animal/bird friend and the fact that she is the new Arelia (think top magic guru), and you have the basic premise of the book.

This book seemed like a melding of a lot of other books/series I have read. That doesn't make it a bad book, but I did find myself thinking of these other books all the time I was reading this one.

I will probably read the next in the series just to see what happens.

This is a wonderful debut novel by Heather Renee! This book has everything. Romance, friendship, magic, journeys, otherworldly lands, magical animals, dark powers, great being, and so much more! This book packed with wonderful writing as well as beautifully built worlds. Heather, as a debut author packs a punch with her skills. This book is amazing and I need her to write faster so I can have book 2.

I fell in love with Kali and Jordan's close friendship and how much they were like me and my best friend. They are fiercely loyal to one another and yet harass each other at every whim in a fun, playful way. Lucas and Kali were perfect, while there is some insta-love going on the author describes in a way that makes sense without anything feel forced or some type of over the top trope. Lucas was dreamy and so loving and protective of Kali and Kali opened that huge heart of hers to him right away, making them perfect! The

supporting cast in this book was well thought as well. Each person brought something to the table and everyone grew on you as they were well written and develop amazingly throughout the rest of the story.

Strix was probably my favorite! I want an owl just like him. Heather describes him beautifully and you can almost reach out and touch his feathers. I'd love to just have an animal companion that you can mentally connect with and hear their thoughts.

I am really interested to see where this author takes this series, as well see how the characters continue to develop. I'm hoping she writes some spin offs from other people's perspectives because it'd be nice to see how they turn out and their inner thoughts and self. This is a debut author to watch as I think she will rise up the book chain quickly! A wonderful read and 5 stars from me!

This was a great book from first time author Heather Renee. I could not put it down and devoured it in just a couple hours. I look forward to what comes next from her! You don't want to miss out on her work!

It was a very good read, I actually enjoyed that it was fast paced. Though the main character was not my fave, I found Jordon was my fave (A great plus was that she got married on my son's and mine Birthday) Cancer love. ? Kali was just I don't know to plain for me, and at times instead of acting like a twenty year old, she acted more like she was 16 or 17. Even her parents acted like she was way younger. I kind of thought her and Jordon should have been switched, but I guess then it would have been like so many other books. I really enjoyed it. Thank you Heather for writing and sharing this wonderful book.

To the Falls was a book that I didn't want to stop reading. It was well written with characters that I really liked. The story line kept me interested from beginning to end.

Kaliah or Kali as everyone calls her is a college student with a fun, crazy and loveable best friend, Jordan. Right before her 20th birthday everything changes for Kali. She finds out that she is a guardian from a place called Arvata. When she returns there with Jordan and her family she is not sure she wants to stay. She misses her life back on earth but that soon changes. She meets the new generation of guardians and lots of others that are not so new. Kali soon meets Lucas and quickly falls for him. As the story develops she learns so much more about Arvata and what it means to be a guardian. Things don't always go as she would like but she keeps doing what is asked of her. When an enemy arises to destroy Arvata will Kali and her friends be able to undo what has happened?

I liked Arvata, the people and just the whole story itself. There is friendship, romance and lots of action. I did think Kali and Lucas falling in love was quite fast but I understand that it is part of the bond. I loved the magic and the things that they are able to do. I can't forget to mention Strix, he was a unique and loveable character. Overall a great book. I am looking forward to reading the sequel.

I can't exactly pinpoint why I disliked this so immensely, but the writing style annoyed me from the get go. I tried putting it down and coming back into it, which helped a little, but alas I called it quits at 55%, which I basically never do. My DNF shelf has now made it to a dozen. I will say my mood probably had a little to do with it- other times I might have forced myself to finish. Maybe that would have made it two stars, but I can't rate something I couldn't bring myself to finish more than one star.

The beginning has too many overly detailed descriptions and the main character's internal monologue was bland. Even as things picked up, she didn't care for the world as she was undecided which made it really hard to connect with her or invest in the world. The dialogue was really basic and didn't read like actual people speaking, and there was so much telling instead of showing it read as younger than it should have.

I didn't like the instant soul mate, there was no build up or anticipation for Kali and Lucas, which made the love interest kind of humdrum. As all the characters in the group found their soulmate at the same time it wasn't anything special, despite professing to be.

Maybe it got better in the second half, or I'm just in the minority on this one.

Aelvana says

Kali has just finished her sophomore year of college when her life turns upside-down. The strange dream she's been having was actually supposed to be a sign pointing to another world, one that she's originally from, and she's inherited the duty to protect the passages between worlds. But someone doesn't want her

stepping into her destiny . . .

I probably shouldn't have finished this, but it started well, so I kept going in the hopes it would turn itself around at least a little by the end.

The beginning actually is decent. Kali's college life (and best friend Jordan) is set up well, and the normal life feels solid enough that it's easy to see why Kali would push so hard against everything magical that tries to reshape her predictable world. Unfortunately, once she goes home for her birthday, the problems start to surface.

First, the book is rife with run-on sentences. A handful would have been annoying, but it feels like I hit at least one a page.

Second, the characters, with the exception of Kali and Jordan, are barely fleshed out. Lucas is the worst offender. As the main love interest, I expected him to have SOME glimmer of his own personality, but his entire character was built around being in love with Kali and doing whatever she wanted. He's got a lot of history and backstory, and very little of that comes through. I wanted to see independent thought, even if he is saddled with finally finding his soulmate.

And yes, the whole soulmate angle takes away any possible complexity to the romance. You know you've found your soulmate because his eyes change color to match, plus the book of your life (which the Fates write in) will confirm it.

Third, the voice is inappropriate for anything but Kali narrating for herself. Here's a sample section of the Fates:

We know you're struggling Kaliah, but please have faith. All of this will make sense soon and you'll be rewarded for your efforts. Trust your instincts and everything will be okay. Not everything is as it seems right now and we need your patience. We are watching out for you even if you don't realize it.

It's too casual to feel like it came from some all-knowing deity (not to mention a missing comma in the first sentence). Why have books at all? Why not have the Fates directly communicate with Kali? Having books that some deity writes in feels like a really weird way to push the plot forward. They basically cheat and tell Kali things she couldn't otherwise know, which takes away any chance of tension since everyone knows the Fates don't lie or make mistakes.

Fourth, the actual villain side is really disappointing. We have one major villain who is basically Mr. Maniacal Laughter who has a somewhat reasonable motive but terrible presentation (and is killed by lightness and goodness. I wish there had been a different way to describe this, or do it). Then we have a possibly more interesting wrinkle with the person who helped him . . . except the Fates underline all the answers as soon as the main characters even wonder about it, so that's no good. And this person is an even less compelling villain.

Overall, this book feels like it really needed another draft to clean up the characters, events, and grammar. Not Recommended.
